

6 Best-Performing Clean Energy ETFs for October 2025

Want to invest in wind or solar energy? Clean energy ETFs make it easy.

The clean energy market is relatively new, and there's no way to know what companies will be the belles of the ball. But rather than try to predict which specific companies will prosper, you can invest in clean energy ETFs and gain wider exposure to the industry as a whole.

What are clean energy ETFs?

Clean energy ETFs are [exchange-traded funds](#) that invest in stocks in the alternative energy sector, which might include solar energy, wind, hydroelectric and geothermal companies. Like other types of funds, clean energy ETFs can easily diversify your portfolio. ETFs also tend to be less expensive than mutual funds.

Best-performing clean energy ETFs

Ticker	Company	Performance (Year)
PBW	Invesco WilderHill Clean Energy ETF	54.02%
....		49.31%
....		46.79%
....		38.30%
....		35.28%

Why invest in clean energy ETFs

With so many automakers committing to making electric vehicles, the long-awaited "green revolution" may have arrived.

Clean energy ETFs offer access to energy companies without having to pick and choose stocks yourself. If you want, you can find clean energy ETFs that specialize in solar or wind, or just opt to invest more broadly across the alternative energy industry.

And while many of these ETFs have five years' worth of data, renewable energy is still a relatively new field. Rather than purchasing single stocks in this field ETFs spread out risk and help diversify your portfolio. That way, you're not relying on a single company.
